

The real cause behind deadly inflation in India, how India is getting killed, in view of an Ex Australian Non Resident Indian who lived in Australia

This computer scientist has 2 degrees in computer sciences, is a post graduate with 18 years of Western Education. Worked in Government Sector in India but left everything in search of truth and God and was blessed by a great mahatma and Guru Shri Sansar Chandra who is a great philosopher, who has studied all great scriptures of all religions and especially of the Hindus, and has written great books on Vyavastha Parivartan(Change of System for India and for the entire world nations who are fighting each other and there is unrest within all nations because of the old systems which are all flawed and are creating fights since the humanity started) and Prakartik Darshan written by my Guru says all men are equal and everyone must get the same opportunities as the same sun shines on everyone, the same air is breathed by all men, the same food from soil nourishes all men, the same fire cooks food for all men, the same sky or aakash covers the whole of humanity. The fights over money, land and women is basically because of the law of Heir or my son who shall inherit all that I have and I will not give a single penny to the poor or the needy. The poor man's son does not get anything from the society while the rich man son has all the advantages because of his birth in a rich family. Everybody must get the same worldly opportunities. The same seasons, same rain, same weather is there for all beings. The mango seed gives mango trees. The guava seed gives guava tree. That is the gods creations give their own results according to their own content and own nature when all beings are given equal opportunities. They developed in the world according to their own basic nature and basic content. Money which is plenty with a rich man is given to his son who is not worthy and he becomes a bad man with this endless money and has spoilt himself totally. This has caused all problems in the world since capitalism started in the world after industrialization. This wrong way of selecting a heir has led to all fights and confusion in the world since the humanity started. The rich mans son is at a great advantage while the poor mans son is left far behind in the world. This is not the fault of the poor man but it is because of the society which has not given him the same opportunity as the rich man to live in the world or to progress. Thus the same opportunity to everyone who is born is not given by the society whether rich or poor. The same light shines on every one the same water or elements of nature are for all beings therefore the same opportunities should be given to all whether rich or poor. Therefore rule of heir ship is wrong and the society should amend it by giving equal opportunities to all. Every one develops or progresses in this world on his, on her own capabilities because of his underlying merit, knowledge, his excellence, his quality, his worth, his value, and his assets. Therefore a useless son should not get riches from his father but this money should go to a deserving other meritorious child of the society who may be son of a poor man. The industrial revolution in Europe brought forward capitalism and gave an opportunity to earn money according to ones own skill and merit and capability. It was all right but that my son should get all the money I earned has brought all chaos in the society and brought devilish capitalism in the society. The people who believe in equal rights for all in society but not equal duties. They give away whatever they earned in the world with bad intentions and their evil ways. They will give away every thing they earned in the world to their children only and will give it to no one else. Then there are those in the society who will look after their children give them good knowledge and good education, food, good healthy habits, good entertainment opportunities, good jobs, good marriages, well settle them but will give their property, assets or money to deserving people or institutions for the betterment of the society. Then the third type of people who have earned a lot but will only give it to their children because of flawed heir ship rules in the society. Their children get lots of property and money. They get corrupt and become bad and spoil themselves and the society in which they live.

Equal opportunities for all means that children from the time they are in womb of mother till the time they are adults should get good food to the mother while they are in womb, good mental and body opportunities, during birth good healthy hospitalization, good food, good education, good directions in life by elders and gurus, good healthy medicines whether pure ayurvedic herbs or western medicines that really benefit. On becoming adult he should get a good job based on his merit and capability from the society or the government. But still as a poor man son gets nothing from his father or only loans to be payed by him to banks while a rich man son get lots of money and wealth to start his life with a bang will employ the poor mans son in his great business. Both of them have not got equal opportunities when they are adults. This rich adult man does all kinds of bad deeds to further earn money all his life and then gives to his son who again does all bad deeds to further enhance his wealth. Thus all chaos in the society is due to wealth and the wealth that is transferred to his non worthy son who misuses money to cause chaos in the society. Thus this heir ship in the society is not good for equal opportunities for all in the society. I will give everything to my undeserving child is the cause of all evil in the society and goes against the saying of Hindus

Poot kapoot to kya dhan sanchaye poot sapoot to kya dhan sancheyae

People in the world earn limitlessly for their children as they think they will die early or they or their children will have no money in the future so keep earning as much as you can. If the society or the government looks after children and their need then the parents will not do bad deeds to earn limitless money for their children. This will stop the system of giving everything to ones child and people will start thinking of the society and the poor deserving children. Thus the whole society should get what a man leaves behind after his death.

A man wants the whole world and its wealth to be under him as he is not satisfied with the little he has and thus he keeps collecting all that he gets from all and keeps a limitless wealth under him. Ravan accumulated endless wealth for himself, Duryodhana did the same as he got wealth from his father Dhritrashtra and it resulted in Mahabharat, Ram was sent to forests as Kekayi wanted the throne for her son was due to wrong heir ship to wealth. If this wealth accumulation and wrong process of heir ship is stopped then all evil from the society vanishes. People will start to look after their wives, children, friends, relatives, society poor people and the needy and will give lots of money to charity. Bad people in the society who keep collecting money for their children due to great attachment with their grown up or earning children keep all the money for them and never give it to deserving poor people in the society

The dowry system has played havoc in the society. As women are killed if less dowry is given. The parents of daughters should give money to their daughters as bank accounts in the daughters name and it should not be given to her in laws or husband. It should be given to married daughters and the daughters should get the interest all her life and upon their death to her sons or daughters

Heir ship is like lottery , gambling or betting money. The son gets everything from his father for no efforts and nowadays will kill his father if he is denied it. There fore limitless accumulation of wealth and giving this whole to ones undeserving son is the root cause of all evils in the society.

Karamfal or next birth (good or bad) is the result of our past deeds in previous lives ascertained by GOD. Bad people do not believe in next births and good or bad fortune in present birth or life and want that their son should get everything from them and do not believe in Gods hand in the well being of sons in this birth and gods hand in miserable life of son in present birth. They will give everything to their son and do not believe in Gods hand in the sons life due to his past birth and deeds in the past birth

This heir ship law of which has gone for millions of years in the world should be banned by the society and law(courts) and the governments all over the world. The governments should look after the progeny(children) and parents should not keep earning endless amounts of money and do all bad deeds in the society for their children and not give everything to their children on their deaths. Limitless accumulation of wealth for ones child has brought forward all the ills in the society. This was done by Dhritrashtra for his son Duryodhana which led to Mahabharata, and the same was done to Ram by his step mother Kekayie to let her own son take over the wealth and throne of Dasratha even though the rightful heir to the throne was Ram who was sent to Forests by Kekayee and father Dasratha.

This heir ship be checked by society the nations governments and rich responsible people in the society should give their wealth to the society deserving poor children , people in need of food, shelter, clothing and diseased people should be given Ayurvedic or Good medicines when they are sick, charity should be on the minds of people, dan for needy sadhus, Poor Brahmins, poor deserving people.

People all over the world are collecting endless money in banks, buying cement real estate properties, buying gold, buying expensive cars, buying ships ,buying mansions, buying small islands, buying businesses, acquiring popular companies, buying shares, buying bitcoins, buying casinos, buying clubs, buying jewellery and what not to be rich and keep security for their many coming generations who are not even born. The poor and the needy have had their lands stolen by governments, development agencies are dying of hunger and disease all over the world, especially in India and China. This has gone unchecked for thousands of years. For money, women, land people all over the world have fought endless wars. People all over the world say that my God is bigger and better than your God therefore either convert and be like me or perish and they are fighting endless wars for the last 2000 years.

This limitless accumulation of wealth by nations and individual has led to chaos and bloodbaths all over the world and has to stop. Corruption in all societies and lands is due to this endless greed and endless desire to accumulate wealth for my sons and my coming generations. This has gone far too long since the humanity started in the world.

All inheritance laws all over the world have been made for future children and nobody cares for needy in the society and is against the concept of equal opportunities for all people in a nation or the whole world. Rich people give every thing to their progeny but never give a penny to the needy, deserving , diseased or poor children. The poor are doomed to lead a horrible life for themselves and their children.

About myself

I have no money ,no wife , no son , no marriage but I live in the house made by my ancestors as nobody in this world presently likes to keep others unless he has an ulterior motive.

“The East is East and the West is West and never the twain shall meet “. Rudyard Kipling a great poet of the west said about Western world and Oriental world.

Each year the, Monsoons are becoming less intense in concrete areas of India and flooding the green areas of India. There is more rain in green areas of northeast India and Kerela, Kashmir, Punjab which have not been spoilt by cement and tarcoal. The parched up and dried areas of indigenous people of India are under cement and tarcoal where they rot and die of hunger and poverty and total chaos in horrible concrete cities. This is the story of dying India in 2018. But I appeal to the Western Powers who have used Indian politicians to destroy India (They have been doing it since 1894 when they enacted the Land Aquistion Act 1894),that they too will be destroyed as the world is one family and one big village.The Hindus say from their Great GITA say that Vasudeva Sarvam (God is in all and everywhere in this world),Vasudev Kutumbakam(the Whole world is one big family).The whole world cant be made Christian or the whole world cant be made Muslim and the Whole world cant be made Buddhist, Nor Have Hindus tried to convert races and people of the whole world. Destruction of one nation affects the neighbours and each part of the world affects other parts. How can you divide the 5 Elements of God that is earth water air fire and the skies.There is but one air in the world who all breathe,there is the same soil or earth that lies in all nations for everyone to sow seeds and then feed its people,there is one same water that lies in the waterways of the entire world,there is but one sky or Aakaash that covers the whole planet and the burning of waste or forests in one part will also do the climate change for the entire world, there is but one fire that lies in the wood and petro gases that helps cook food of all peoples of the world. The destruction of nature in India and China , The destruction of Great Indian Himalayas, The destruction of Indian ,Chinese lands and Destruction of clean and beautiful rivers in India and China , destruction of Indian Oceans and

Chinese Seas, the destruction of Indian ,Chinese farmlands will also affect the Western countries as the same air water soil skies fire will also destroy your lands too. There have been no rains in Australia, South Africa, Iran, Afghanistan and many parts of Asia are drying up without rains and dried up rivers. There have been fires all over forests In the Western World and Australia.

No country can remain aloof and say it is safe. The live and let die policy of the western world will not work. Your karmas(or your deeds or what you do through out the world will affect you too) will come back to you as says the Great GITA. You shall reap what you sow.The Bible says that do not do unto others what you do not want others to do to you.Be a good neighbor. You cannot kill a country or a race or people and remain aloof and say that we are safe. To hell with others.No this world is one family and nobody can kill, fool or destroy Gods Creations of farms forests green mountains and clean rivers.Either we all live side by side or we all die together in this one GODS world.The God of Christians cant be bigger than the God of Muslims or the Gods of Hindus.There is only one God for all people, faiths , races ,regions , all times and all terrains, all countries ,all colored people whether white, yellow ,red ,brown or black.All are equal in the eyes of God and no one is superior or inferior in His Eyes.The people who live in the West call him GOD(Generator Operator and Destroyer, in Persia they call him Khuda,in Arabia they call him ALLAH ,in India They call him Shiv,In Punjab the Sikhs call Him Rab or One Wahe Guru or one Akal Purush ,in the Buddhist lands they call him Buddha.The Muslims ruled over India for 800 years but could not covert the the whole country by all means, the Western Powers ruled over for 250 years India but could not convert whole of India by all means at their disposal.It is shame that they will not listen to what their own scriptures say or what their own saints say but they have only one desire that is to make the whole world Christian or whole world Muslim or the whole world Buddhist or the whole world Hindu.They will not do what good and will do all evil to destroy other parts of the world or other nations or other people,other races other terrains other religions and other countries.

It is fight between evil and good.You just cant put a good man down good people down ,good race race or good nation down. You just cant say I have nuclear weapons so I shall destroy the other nations and races .The good will bounce back from destruction and will live till God wants it to live.The loss or profit, the life or death, To be famous or infamous in this entire world is in the hands of God.No religion can say I shall wipe out the others as no one religion succeeded in the past as the history says.The Christians in Germany tried killing

all Jews but they failed.The Muslims tried to wipe out all other religions from the face of earth but that was in vain as we see all religions are alive and flourishing in all corners of the world.This world cant have one religion and religion cannot be wiped out as communists tried in Russia.Mobility and connectivity by trains,aircrafts

Buses,cars,ships,boats has brought chaos and confusion in all and each lands but we have to listen to all religions while we ardently follow our own religion we have to respect other's religion and not convert and increase our numbers in the world.You just cannot kill the other religion and stay safe in this one world family.This human race is the creation of God or Allah and will not get destroyed by the other.No body has the power to destroy the indestructible or everlasting God OR Allah.He has made this earth, the heavens,the hells ,the world races(people),the planets,the seasons, the Agriculture,the farms forest green mountains and clean rivers and the animals, the seeds, the herbs , the plants, water , air , soil fire and skies the aakaash,the oceans.Stop killing others in the name of religion or the all mighty will kill you yourself.Stop disgracing other religion or you shall be disgraced youself.Stop wiping other nations as you will be wiped out youself.This is for all nations , all heads of nations, all religious heads in the world,all races,all colored people, all terrains and countries ,all regions of the world

The farms forests green mountains are getting uprooted and instead millions of cement concrete jungles and millions of 14 lane roads are covering whole of Indian soil cover with cement and tarcoal. Billions of rupees of cement is sold in the open market and in the name of development is destroying whole of India. This is surely going to make 125 crore Indians go without food(very soon).South India saint Thiruvalluvar in his book Thirukurul sloka 742 said " The real power of India is its farms ,forests ,green mountains and clean rivers" . Ever since 1894 when the Western Powers under Lord Dalhousie inacted the draconian Land Acquisition Act 1894 on India the lands of India have vanished. Since 1947 all Governments and politicians have misused this Act and taken away lands (farms forests green mountains) from farmers and adivasis and paharis and turned them into cement and tarcoal. The whole of this nation has been misguided by the Western Powers who in fact are running this Indian country by proxy since 1947. They have kept their own countries green and clean while they have misguided whole of India into making India a rubbish bin of cement concrete and tarcoal. These Western nations want that India be made a cement rubbish bin so that the hungry Indians can be easily converted to foreign religions. They will use their vast lands and massive agricultural produce to convert whole of India. Massive food imports from Western nations have started to arrive in India since 1991 as all The Indian governments have opened the doors to Western nations. Two rotis are enough to convert a man in deep hunger. The 300,000 square kilometers of land around Delhi is covered in concrete. If this land was soil covered it would have soaked the water from Monsoons and would have recharged the underground water supplies in and around Delhi. People In and around Delhi are dying and killing each other in summer months for lack of water. The Agriculture and soil cover of Delhi and surrounding areas has vanished and has made life unlivable. Since 2006 the incharge Governments had under Bharat Nirman policy has made whole of India a cement , concrete , tarcoal bin by building millions of 14 lane highways and thousands of new and old ever expanding cities all over India. Since 2014 same has been done by governments since they have been in power till 2018.Under this trend we see a great hand of Western nations who are actually running India by Proxy since 1947. The Hind Swaraj or Home Rule Of Gandhi ji was sidelined and overlooked by stooges of the western powers in India. The

Western nations have not given us the technique of making cement as the cement in Australia lasts for 500 years and the Indian cement lasts for only 50 years and after 50 years the cement buildings in India fall on heads of Indians and kill them. The same is true of tarcoal roads of Australia that last for 300 years. In the western world very less area is under cement and they have very narrow roads with no dividers and traffic is very smooth and easy flowing on their roads. They have not given Indians the technique of making cities. Our Indian Cities are unlivable and like hell on earth. The roads there slide towards the left and right ends so that in the rains the water flows to both sides and fills the massive soil cover (green cover) that they have on both sides of the roads and is soaked to the underground. India does not need enemies it will be killed and filled by cement and tarcoal by these very Indian Governments which are being actually run by Western Powers since 1947. India since 1947 has uprooted its farms forests green mountains and as a result the Monsoons are failing whole of India continuously since 1947 and so also its politicians are also misguiding this whole nation since 1947. The Western world ruled India for 250 years but failed to convert India to foreign religions have now realized that the only way to convert whole of India is to first take away its lands and then convert the hungry Indians. That is why they enacted the Land Acquisition Act 1894. The mud and wooden houses in India since millions of years were cold during hot summers and hot and comfortable during cold winters. They would last for 500 years and never killed anyone during earthquakes. Not a single rupee was wasted in building them, and not a single rupee was wasted in running them. The soil covered lands of India gave out hot water during winters and cold water during summers. It was Gods miracles. And nobody knew of electricity bills, phone bills, Gas bills, water bills, maid bills and house tax bills, TV bills, mobile bills, computer bills and tens of other bills. The modern man works like a mad dog just to pay bills and never ending bills. Most of all these cement structures in India last only for 50 years and then fall on the heads of users and kill them. In war in India these falling structures will kill millions in India. The western world has not been able to overpower the Afghans in Afghanistan as 90 % of them live in mud houses and the aerial bombing has not been able to wipe out mud houses as they are only one story tall and are wide spread along all villages and not clustered like cement homes around Delhi. Most of the villages in Muslim World have mud houses. They could not be misguided like Indians who live in cement houses that were deliberately made by Western Powers to kill India. has more population density than India but still has 85 % of soil cover or green cover. In Australia I travelled widely in New South Wales and Queensland and was just shell shocked to see only soil covered and green covered lands with massive Agriculture and very healthy, lively and prosperous and rich farmers. They eat and export most of their agricultural produce all over the Western world and are extremely rich. India as like this until the Western Powers arrived and ruined us. The increasing and growing population of India need more farms and forests for its survival but exactly opposite is going on (farms and forests are systematically being killed by all politicians). Please do not say that the increasing population needs more of concrete structures. Even if 200 crores of people lived in India today and if this concretization of India had not happened they would have lived and happily fed themselves in soil covered India. But with this ever increasing concretization of India not a single roti will be available very soon. I am surprised to see people and political parties madly fighting out each other and cutting each other's throats all over India and not focusing on the disappearing farms forests green mountains and clean rivers all over India. Nobody in India cares for people dying of hunger and poverty and political parties are making it more worse as time passes. The Governments are building concrete Special economic zones (SEZ) and billions of high rise concrete houses for poor (Pradhan Mantri awas yojana). When people became anti SEZ western minded governments in India are building billions of low quality concrete high rise houses for the poor. These will also lead to deaths of billions of poor as these low quality homes will collapse in 50 years (their lifetime). This is rubbish as the villagers and poor were already living in comfortable mud houses in their serene and sleepy and prosperous villages in the very few remaining villages all over India.

They say they will provide jobs to villagers by building millions of concrete jungles and factories. This is also rubbish as the farmers and villagers are already leading prosperous lives in green villages. Nothing except agriculture can give permanent job to millions of Indians. Nothing except Agriculture has helped Indians to prosper for millions of years in the past and the same can be said of the future. People in West cry for jobs in cities are all anti agriculture and anti nature. Roti is the biggest God on earth and it will not come from cemented cities and tarcoal roads. Since 1947 all governments have broken the backbone of India (Agriculture), under the influence of the West and in the name of Development. The Government Machinery in India has worked for the West and has made lakhs of hells as Delhi all over India. They will make first make 100 SEZ then in thousands and finally in Lakhs and in the end the whole of India will be made a Factory (SEZ), and as a result the monsoon will fail India and agriculture will become a totally unprofitable job. The factories which will produce synthetic and unnatural goods for India and the governments will call it 10 % growth and will say we are giving employment and jobs to the poor. Everyday the newspapers are taking whole of India for a ride by calling it growth and growth of the boom bust economy. In the first place you are creating poor people all over India (since 1894) by taking away their lands and their agricultural livelihoods.

About 300 years back India was living in mud houses along clean rivers and massive Agriculture made India the most powerful and prosperous lands on the planet. The Western Powers with their futuristic and long term vision for India in 1894 have totally ruined India of 2019 by proxy raj over present India with the help of all politicians. The Western Powers and the Americans with total interference in India have ruined all serene pristine villages, killed agriculture all over India and have replaced it with hell like polluting cities and 14 lane highways (tarcoal) with the help of 1894 Land Acquisition Act. The Western Powers call this modern India.

People worked for farms , forests clean rivers and green mountains and tended their cows(GO mata) and with massive jadi booties and herbs from the forests were healthy and without any diseases. Present India is hungry, malnourished and totally diseased and living with all kinds of polluted air water soil and skies. In prithvi we have put cement, in water we have put non bio degradable detergent soaps(For millions of years India washed its cotton clothes with rey or rai (natural soap found in our clean waterways all over India) which was totally biodegradable and never polluted any of its rivers) ,in air we have put diesel and petrol wastes and agni of natural wood of the chullha has been replaced by piped natural gas that has made all the food poison and ruined the stomachs of all Indians. Aakaash could not be overpowered by western people as there lies the abode of God. Millions of factories and lakhs of massive decadent cities all over India have made rivers black poisonous nallahs with very less water and the flow has been further checked by lakhs of dams which have stopped the natural flow of rivers and is the major cause of floods all over India in Monsoon time.In 1947 we had 7-8 lakh pristine serene and beautiful villages in India. In 2018, 30-40 crore people living in and around Delhi in Concrete jungles will either get killed by Pakistani nuclear bombs or will die under the collapse of these structures as their life gets over in 50 years.

The biggest weapon of Western Powers and Indian Governments has been money or compensation or spreading greed among farmers and instead usurping or taking away their lands. They call it muawza . By giving money to poor farmers who will spend it on Sharaab or wine and further building their concrete homes for their false future security. Each concrete village in Delhi has 10 Sharaab or English Wine shops. As their lands, livelihood, livestock, cattle and food is gone the farmers die a slow death in polluted cities by becoming rickshawalas.

The western world will relocate all its polluting industries to new addresses in India and China and will make their own countries green and clean and will make rubbish bin out of India and China. We both have stood against western imperialism and survived their onslaughts for 400 years. I do not understand why India and China fight each other when we have similar cultures and Budhha Bhagwan is respected in both of them. We both have similar problems and together we can fight western hegemony in the world today .We fought the 1962 war when the USSR and the West had divided us on all lines and never wanted that India and China should unite.

We soon in India will have lots of paper or note currency but no food in sight. The government did demonetization to heck the flow of fake currency from Pakistan but as time passes fake currency will again be made and passed to India

again and again in the future. The fake money in India will again be generated by anti national people in future . what was the use of banning paper notes. Paper notes be banned forever and expensive metal currency be run as was used 500 years back as this will really stop fake currency. No anti national will able to make fake expensive metal currency.

Soon in India we will have no food and people will live a hellish life in hellish cities and work in horrible , polluted cement factories and for the want of rotis they will convert to other religions for the want of food. We have seen how pure Ghee , butter and pure mustard oil is either adulterated or has totally vanished in our concrete cities as .Bad quality vegetables that are grown in polluted waters of our rivers are available in cities. The malwa belt in Punjab has the highest rate of cancer because of chemical fertilizers being used to unnaturally increase production in ever decreasing farm size all over India. The Agriculture scientist say do not worry about farm areas getting reduced increase your productivity. The limited lands have their own limits of producing food but they insist on increasing productivity by using chemical fertilizers which is further making the lands barren. Every way India loses.

Since 1947 all governments say we will build lakhs of more factories. Majority of the factories are lying sick (built on farmlands) with bad Indian quality products which are not even fit for our poor country let alone export. These factories do not produce anything worthwhile and have eaten up all valuable farmlands of India.These factory structures will also collapse in 50 years and kill people and create lots of cement malba that can be seen in our farms in NOIDA and elsewhere in our country.Lakhs of factories are being made by all governments all over India. Surely roti

And food will vanish as a result.

According to Government of India 1000 people die on these very 14 lane roads every day all over India which have been made by Governments under the guidance of Western powers who insist every day on connectivity and infrastructure development in India.They have built lakhs of concrete cities in India and now are connecting each one with all other by 14-16 lane roads all over India. In Australia and in Europe there are very very few narrow roads with very few number of cement cities. Most of the Lands in Western world are in their pristine glory and they will not even waste one inch of their valuable lands with cement as they have done in India since 1947.

Factory jobs , city jobs , science jobs are all temporary and will leave you in stranded once better technique comes in but the jobs provided by farms, forests , clean rivers, and green mountains are permanent unless we destroy them with cement and climate change. We in India cannot do a mad chasing of technique as done by Japanese to earn their bread from the west, and surely we cannot feed India by these science and technique jobs. Surely we have to save our farms and forests for future generations for massive food that we need for our growing population.

In the mountains we have dug up muddy villages , farms ,forests, for cement cities and dangerous roads. Due to landslides and earth movements in the monsoon season millions lose life. All these dangerous roads in the Himalayas turn to tarcoal malba and cement malba in the green and beautiful mountains that India had for millions of years.The rubbish vehicles that are built in India fall into deep gorges and valleys from these dangerous roads in the Himalayas and kills lakhs of people every year.

Billions of vehicles that are being run on loans from banks brought with billions of rupees, run on foreign fuel by paying billions of dollars in the international markets, spread pollution all over India and finally kills 1000 people daily on dangerous Indian 14 lane roads which are being built by politicians with the tax that is got from poor people in India under the misguidance of western powers. If 10 % of the money spent on vehicles or cement homes was sensibly spent on agriculture then Indians would not have died of hunger and malnutrition all over India.The west will give you loans and lots of aid by IMF,WORLD BANK,UNO, AID from UK and USA, by Asian Development Banks, Japanese Banks and other banks in the Middle East to make India full of cement and tarcoal. Yes they want India should either die or convert to foreign religions as India has survived for too long with its own religion and they never converted to western religions as ruled over them for 300 years.

All a country really needs is food for their population and herbs (Great Ayurveda) from their forests for the sick and strong army to keep the enemies out. All other development is rubbish for the environment and for agriculture. Jai jawan jai kisan was totally ignored by all political parties and India was taken into useless directions and totally misguided into chaos by the west which has a tight grip over all politicians in India.

The west has not given Indians the technique of city building , cement making, or tarcoal making. The cement structures and tarcoal roads in the west last for 300-400 years where as in India with poor technique given by west last only for 50 years and then fall and collapse and kill lakhs of people in India each year. The old forts of Rajasthan have stood for 5000 years and the limestone and mud houses have 500 year life. These mud houses are cool in the hot Indian summers and hot and comfortable in cold winters. They never kill in Earthquakes and with 8 lakh mud villages spread evenly all over India they could not be overpowered by the West who ruled over India for 300 years. These 40 crore people who have been caged in wide spread one story Concrete jungles around Delhi(and all over India), will die a fearsome death by Pakistani missiles and nuclear bombs in case of war. Then the west will shed wolves tears and will send in rescue teams with sniffer dogs all over to show its false closeness with the people of India with chemical medicines and biscuits(with false sympathy and closeness that it has with the people in India)They are the ones who partitioned India gave arms to Pakistan to kill Indians and gave arms to Indians to kill Pakistanis while they watched the drama unfold and laughed how they tricked India and Pakistan into wars. Divide the whole world and rule the world by proxy is their old policy. With the help of politicians in India they have divided India on caste, religion, regions, languages, colour, states God knows on what all basis to see an Indian fighting another fellow Indian on these lines while they had a great laugh.The west has only one policy for people all over India and China that of Live And let Die. Live whole heartedly yourself but kill others and let others die and help them in dying.This is what they have done all over Buddhist lands, Muslim lands and Hindu lands all over the world. While having annexed the Lands all over Americas, Africa, Australia, and elsewhere with superior guns and armies the Europeans have captured and killed millions of indigenous people all over the earth and destroyed cultures and civilisations but now advertise all over the World with the help of UN , NGO, Humanitarian Agencies, Amnesty International,Aid Agencies in case of disasters (shedding crocodile tears all over) and their offices they speak of HUMAN RIGHTS and BEING HUMAN POLICIES WHICH THEY THEMSELVES HAVE VIOLATED FOR CENTURIES ALL OVER THE WORLD.The west survives onfalse propaganda all over the world make nations fight each other and kill or support nations and people all over the world with superior weapons and bombing aircrafts and offensive armies. They will use any means at their disposal to kill or support nations all over the world for their own interests. Democracy and its civilizational values is a big big excuse to prop up dictators and remove their enemies make nations fight each other by giving weapons and army techniques.The problem is that with their propaganda, their doiplomacy, their agencies all over the world they fool people and trick them into wars. In these hopeless conditions all over the world they covert nations and people.

Even if 200 crores of people existed in India today (2018) they would not have lived in Hunger and malnutrition if this concrete jungles and tarcoal roads were not built in the first place by politicians under the misguidance of Western Powers since 1947.We in pre 1947 India had enough roads and massive railway lines all over to India for connectivity built by West to send in Armies to tackle Indians and subjugate them in case of uprisings against their rule. Pre 1947 India already had strong road and railway network set by the west to deliver anything from food, goods and armies to rule over India. It was a rubbish Idea of politicians to once again build millions of 14-20 lane roads connecting lakhs of concrete cities which ate up all rich agricultural lands in post 1947 India. To kisans all over India I will say "die a honorable death to save your farms but do not give in your lands for false development(Destruction) and false propaganda being run by Western Powers.

Fake news can be seen all over media in India that country had record production of grains. Therefore do not worry about declining agricultural lands and disappearing forests green mountains and clean rivers and falling food production in India for the last 3 decades especially after 1991 when India opened the doors to west and lots of western misguidance. In reality massive imports of food other fruits is being done by central governments wasting foreign currency to fool the people of India that it had a great Agriculture production. And still in reality millions go hungry in India in all its concrete cities every day. The

total media in India is controlled by foreign powers who misguide and fool the simple people of India. In reality lots of food is exported from India that leaves millions in India in Hunger and Malnutrition while the foreign powers enjoy our food who have lots of petro dollars and strong Dollar, Euro, Yen, Pound. Lots of GO(cow) meat is exported from India as the indigenous cow vanishes from India for Dollars. India has seen a total decline in its economic power, political downfall and declining agriculture since 1947. No one in the world cares for destroyed India and its great values, and they laugh all over the world and they call us "slum dogs", "you bloody Indian" when you travel to their Western lands. People of Indian Origin who live in the west either live a secluded lives away from Western values or convert to foreign religions but most of them laugh and ridicule India for its values and eternal religion.

All the concrete cities in India have been layered with tiles cement and concrete and they have not let any soil covered areas in Indian cities. That is why the Indian cities are dying of water in summer months and people kill each other for water and roti. The Land acquisition of 1894 has made India die for roti and water in all its millions of concrete cities. In Australia when I worked there, they leave 100 meters of green cover along their city roads (these roads slide towards their left and right sides and the rainy water can be seen sliding towards the sides to fill in their city under ground reservoirs in these massive roadside soil cover and greenery) where people can be seen going barefooted to their place of work in Green areas in their cities. Millions of Cities with Millions of Development Authorities in all Indian cities are basically taking away agricultural lands and turning them into concrete with the help of Builder mafias, politicians, bureaucrats, administrators, cement industry, tarcoal road builders and real estate builders and with the complete Government Machinery of ministries and foreign aid to take India on the path of hell.

All politicians listen to Western powers attentively to destroy India and ignore the majority of poor farmers, poor people of forests, and most of the people in India live in misery and hopelessness

The Great Ayurveda is dying its death as forests of India have disappeared with no jadi booties (Great Indian Ayurvedic Herbs) and The Herbal doctors (Ayurvedic doctors) are a dying race. The few remaining Ayurvedic doctors who flourished in India's past who cured Ancient India of Diseases in real sense can now be seen begging for money in cities with the majority of Indian people dying in Horrible diseased Hospitals all over India. These horrible Diseased hospital themselves are the source of majority illnesses seen in India with contaminated blood from blood banks who survive on bad blood from drug addicts and dying people. The Western medicines and allopathy has no cure for majority of diseases but survives of false Western propaganda and Medical Institutions who are churning out doctors in billions all over the world. Their money making MNC Medical companies make billions of dollars every hour all over the world but fail to give cure for majority of diseases in the entire world.

Until unless Change of System does not happen in India (2018), the country will lose all its agricultural lands (farms), Great Ayurveda, Forests, clean rivers and green mountains and will end up as a failed state which Western powers call a nation when they have totally destroyed it with its draconian policies.

The cities in India wash their clothes with non-Biodegradable detergents which pollute Indian rivers millions of years. The ancient India washed its pure cotton clothes with rai (rey) which was a natural soap that was totally biodegradable and kept the rivers of India totally clean. With millions of factories and their effluents (chemical wastes) and lakhs of cities wastes (Like Harpic, acids, surf, nirma, fena, and hundreds of pesticides, chemicals in the lands, chemical fertilizers (which have made the lands barren)) the rivers and water ways of India have become totally poisonous black dried up nullahs. The remaining flow of the Great rivers has been checked by lakhs of dams and hydroelectric projects to provide electricity which has done nothing but spread Western Hospitals, Western Cities, Cement and concrete cities, Western Schools, Western Universities, Western Factories, Western Industries, Western Education that leads to false Western educated Indians who exploit nature, who are anti agricultural people, anti Nature people, anti Indian, city loving people who live sedentary lifestyles in cities work on computers, mobiles, TVs and spoil their health and eyes. The massive diseased city dwellers can be seen all over the world who do not work hard like poor farmers, who by using pens and computers, paper work fool each other in courts (lawyers) (there is no justice in these courts, people with money get favorable verdicts), hospitals (doctors in the west do not have answers to majority of illnesses but only fool people and make lots of money), offices (the officers in India subjugate the lower staff to further spread western culture in India), ministries (are all working for Western powers), parliaments (the politicians are working for foreign powers), the complete Indian Government machinery works for Western Powers.

The Indian Governments say that they are building low quality high rise building (homes) for millions of poor people in cities by kicking them out of serene, quiet, pristine and grand livable green villages (who are employed by nature in their lands). They are being kicked out of their villages (mud and wooden homes which last for 500 years), without livelihoods without livestock without food or alternative jobs in decadent, horrible polluted hellish concrete cities all over India. These low quality high rise buildings which have been built by low quality Indian cement which will collapse in 50 years (its lifetime). Thousands of such

buildings have collapsed since 1947 killed lakhs especially in the Monsoons. These low quality high rise buildings have few buyers, totally exploit areas for water and other natural resources, not fire resistant, with no security against terrorists, open for Pakistani nuclear bombs and missiles, will finally collapse and kill residents when the life of Indian (building)cement gets over in 50 years and will leave behind nothing but dangerous cement malba that will further kill Indian lands.

The Indian cities are a horrible sight in the summers when the cement heats up to hell and cause heat waves and continuous shining sun. The muddy lands are all gone around cities which used to cool down in the evenings in India. The concrete heats up to hell and people all over India are busy buying Anti Nature air conditioners and air purifiers, which gives rise to more and more electricity needs and makes life hell for everyone. There is no water in these cities and people with submersible pumps have already finished the underground natural supplies of water under Indian cities. These cities are totally covered with concrete and with no water soaking soil cover and with the little water from failing Monsoons cannot replenish the underground water supplies. The western powers say please plant trees to save environment(misleading the entire country) in such concrete spaces which die away soon as there is no soil cover only concrete covered areas in cities of India. They say do water harvesting which cannot be done in concrete covered lands. The foreign powers misguide India and say it is all due to climate change, Global warming, El Nino effects. It is rubbish as it is all due lands which are all covered in concrete and tarcoal do not give any cooling effects from the cool soil in the evenings when the terrible sun stops to shine. If I had my way I would smash all these concrete jungles and tarcoal roads, put them on a mall train to the seas and dump them in the Oceans forever and rejuvenate this doomed land with mud, soil cover, clean waterways, clean air from greenery that lies under cement and tarcoal, clean agriculture, forests, green mountains and all the elements of nature and Gods real world that lies hidden. The people all over the world segregate their garbage but it could not be done in India due to political bastards who are under the influence of the western powers. India and China are made to fight each other due to the diplomatic interference of the west and are massive building roads and massive concrete cities in the entire Himalayas to win and fight wars with each other. The politicians on both sides are being fooled by the west and with little education on dying environment on both sides of the Himalayas. The rivers, rivulets, lakes, water fall are all drying up in the Himalayas and both India and China are without land, water, agriculture, forests for their growing populations. While people in the west laugh over the way they are destroying India and China. India and China are the oldest cultures and oldest religions on earth who have stood against the destructive west for the last 500 years. They are both being fooled by the west presently. Both countries are goaded by the west to make millions of factories, decadent concrete cities, 20 lane roads (cement and tarcoal development) and both countries lie in massive pollution, with black poisonous rivers, hunger, poverty, without agriculture, with maddening 10% growth of Synthetic, unnatural factory goods, without cotton clothes(plastic clothes are sold in both the countries), without mud and wooden houses, without forests and herbal medicines, without natural resources from the polluted oceans and what not. This 10% growth is to satisfy IMF, WORLD BANK, UNO the western powers and nothing is done to alleviate suffering millions in both the countries who go without food, water, air, homeless as they cannot afford expensive concrete homes, no herbal medicines they could afford in the past from forests and their lives are in total chaos in the ever growing and expanding concrete cities (India and China). Same things are happening on the Pakistani Indian borders. In 1991 India opened to the west under Sardar Manmohan Singh and is being led into chaos ever since as the western powers now have a strong grip over Indian politicians and are totally interfering in all affairs of India. They are taking India to total destruction. In Delhi's Cannought Place we see only Western MNC companies selling their expensive goods. The Indian companies are all gone or acquired with strong dollar MNC and Indian Industries are all shut up for good and has left millions without jobs, money and food. This has happened due to the politicians ever since 1991 reforms which has invited the whole western world here.

Millions of toilets or shauchalayas have been opened without any sewage outlet pipes to the waterways and are spreading misery with shit and piss all over the Indian cities and villages. Poor people are used to carry shit and piss of people of cities in India and China and are being misguided by west who say India, China do not look after its poor and thus divided and ruled by west and then finally convert them to foreign religions. This is happening in all old towns of China and India. People in the past in India pissed and shitted in the vast lands which turned to manure and enriched agriculture without chemicals. The leaves, the kitchen waste, the animal piss and shit, cow(GO) dung, was all natural and enriched the farms of India but now we have plastic (synthetic) waste in the cities which the stupid city government officials are using to make manure for farms and forests for India. This is being done to misguide Indians to total chaos by the west and the Govt Machinery in India.

People in India 500 years back, in 8 lakh serene villages who worked in the farms, looked after their go mata were all healthy and without diseases were fighting fit and never needed any help from crooked foreigners, studied in gurukuls, worked for their own country and gave fitting replies to invasions for millions of years. All this is gone. This was all destroyed by the west and the sone ki chidiya is presently a black crow. 1894 land acquisition act is responsible for this misery in India. Present India (2018) is one of the poorest, diseased, hungry country on the planet, without cotton clothes, thirsty and without clean water and in total chaos. Courtesy the Western powers and their stooges in the Political system in India since 1947.

If India is to rise again then they will have to Change the Western System in India do a vyavastha parivartan bring in a new system that has been formulated by a wise man called Sansar Chandra who is not only western educated, lived in Britain, Seen Westminster Style of Government, Listened to Parliament of Britain, read all Hindu scriptures formulated his own Vyavastha

Parivartan non flawed system , written books on Prakartik Darshan, is a great philosopher, Who has left his home and children wife, to awaken India and the world with his great vision for India and the Chaotic System, of the west which have not only brought misery for their own people but who ruined the entire world with flawed system of governance. The whole world is fighting for natural resources inside their own nations and with all the other nations of the world. Is there an end to this chaos in the wide world or the world is doomed to end with another world war, another nuclear war. Will technology and science ruin everyone on planet. Will there be a climate change all over that will kill everyone. The answer lies in the great works of Shri Sansar Chandra who is still living and can save the dying world as the world is being run by power hungry, natural resource grabbing, money grabbing greedy people, using police , armies, guns , weapons, space weapons , aircraft bombers , nuclear bombs, creating wars and destroying nations, increasing conflict zones , using covert operations, propping up dictators who exploit, dominating nations, creating dominated nations, spreading poverty ,killing nations , helping only their allies and not the human race. Sansar Chandra is a great spiritual follower of Ma Durga and has done 40 years of Bhakti of Ma Durga with spiritual sadhus in India.Ma durga is the only light that can save this dying and doomed world from total destruction. He is all knowing ,all powerful spiritually considers all beings as atma or soul of the one God , believes in only one God and no two or many Gods. Otherwise the politicians of the powerful nations will make everyone fight each other on the basis of ideologies, religion ,races, color, rich and poor divisions,world religious scriptures, regions,terrains,nations,allies and enemies, and all the human divisions of culture.They are not the friends of Humanity they are enemies of the One God and will Destroy this great creation.Sansar Chandra has been without home since 1982 wanders all over India with his revolutionary ideologies that will save the dying world. He is a sanyasi blessed by Ma Durga , has money and with like minded thousands of his followers can save the entire dying world.He knows what has gone wrong with worldly systems that are flawed and have brought the mankind to this chaos.His mobile numbers are 8800598564,8800901448.His office is 601 Rohit House , Tolstoy Marg,Cannaught Place New Delhi 110001.

Western MNC are building malls all over India on Agricultural Lands selling their products,goods,services,assembling products in India ,using India as a great market, fooling Indians, closing down local factories, putting people out of business, destroying Indian farms , forests,clean rivers and green ,mountains, closing down indigenous systems of herbal medicines,furthering their interests,closing down Indian systems, converting poor people to foreign religions by divide and rule policy of west and will make life hell for all Indians.Their live and let die policy is showing wonders all over India and China.They will take all natural resources of India , China, like cotton, food, herbal medicines, spices ,silk, and in return will give only expensive killer cars, expensive killing aeroplanes, expensive killing weapon systems, expensive clothes that they say are branded, expensive chemical drugs , expensive fertilizers that pollute Indian farms, divide india into western cultured cities and poor rural India with dying villagers, dying villages ,dying farms,dying forests, dying rivers with millions of dams that have dried them, give Harpic and other foreign brand detergents that totally pollute Indian waterways,will give bullet trains set up tracks by developing them on our limited farms,make hospital that sell western medicines,make schools that give only western ideology,make medical colleges that churns out allopathic doctors who loot and kill people by western operations, make engineering colleges who destroy nature and lands all over India and and the world ,make universities that give western ideologies and culture, make western music which is basically electronic and produces noise pollution. Their computer ,internet,information technology,mobiles,Television ,cable network has looted the entire world, spread flawed western Ideology, misguided nations and people, spoil the eyes of their own people and whosoever works on these gadgets. The cotton has become expensive or is non existent in India with the Khadi Gram Udyog which is giving out bad quality cotton clothes ,which are extremely expensive out of reach of all poor people in India and these KHADI GRAM UDYOG are using plastic threads and plastic clothes for the poor. 90 % of poor Indians are wearing plastic clothes. The Sheep and Goats are nowhere in India and we do not get pure wool. The cotton rajias or cotton blankets are no more. 90 % poor people in India are using plastic blankets for winters. The seasons are no more .The cold winters of Delhi are no more. All we have is 10 months of terrible heat in burning heated up concrete cities and only very ,mild winters of the remaining 2 months.These concrete cities give burning heated heat waves in the 10 months heat up during summers and are give cold sensations in winter of 2 months. These are not comfortable and natural like inexpensive mud homes of our past. Fab India

If you trade with the west for their own western interests they will place sanctions on nations if you do not listen to them and do what they please, they will place embargos if they see they are not getting lots of money and profits in trade, they will place tarrifs on your goods so that they not sell in west, they will place duties on your products to make them expensive in west , they will give subsidies to their own farmers but will not let poor nations give subsidies to their poor farmers and their farm products finally they will misguide nations (India and China) to leave aside agriculture and forestry and will defeat you in trade wars if you are doing what they want us to do in their own western interests. They will only export factory products to nations all around the world while they will take all your

The west will plunder natural resources like cotton, food, fruits, oil, gas, petroleum, other nations around the globe. They will export goods and services but will not let you enter or live in their nations. They will kick you out of West and will never let you enter their wealthy and green and clean nations while they put chaos, confusion, factories, concrete cities, infrastructure

structure development (ports for their ships, airports for their flights) like trains, cars, aeroplanes, mining, cement making, natural resource exploitation, road building for their expensive cars, basically will create hell by development in resource rich poor nations all around the world. The MNC companies all around the world exploit natural resources, dirty lands, sell their expensive products, kill local industries, acquire local popular brands and local companies and loot local resources and eat lots of profits, have their monopoly in the markets and will sell their expensive products everywhere. West, Japan, Europe and other rich nations are doing this thing all around the world with their superior technology which keeps changing everyday and rules, exploits the whole world.

Khadi gram udyog in India have no supply of cotton and the cotton is purchased by Western People with superior Dollar (paper money that they keep printing all around the world to topple governments and regimes who go against them). The westerners enjoy the cotton grown by poor Indian farmers while the 90% of the poor in India wear plastic and synthetic clothes. The cotton clothes in Khadi Shops which used to be very good 10 years back has gone down drastically and the kurtas they give tear apart in two washes. Kurtas used to be 100 rupees per piece (ten years back) but nowadays they charge 2000 rupees per kurta. The Fab India a modern khadi shop owned by a foreigner in India charges 3000-4000 per Kurta or a khadi shirt. Most of the khadi Gram udyog shops do not get cotton supply and are using plastic, synthetic thread to make clothes but charge very very high money for their useless products.

The whole media in India is in the hands of the foreigners and they will not let you write on truth or farms, forests, green mountains, or clean rivers which are being destroyed. Fake news is widespread and the mainstream media will not let you know the truth.

200 years back the whole country lived in mud houses. Not a single rupee was wasted to build them and not a single rupee was wasted in running them. These mud houses never killed in Earthquakes, were cool during hot summer months and were hot and comfortable in cold winter months. These homes were made from mud, limestone and their life was 500 years. The forts of Rajasthan have stood for 5000 years. What is the bloody need of fake Indian technology Cement structures that fall apart in 50 years and kill people. We read in news that the high rise buildings are coming up in every nook and corner of India are being built for poor. It is a lie as they cost great money, fall apart in 50 years kill residents, kill in fires, are not at all secure from terrorists, are a great burden on natural resources, kill in earthquakes, and people keep paying heavy bills all their lives to run them. These buildings have brought hell on earth.

The five elements of God are all gone. Soil in India is full of cement and tarcoal, the water is full of black chemicals, air is full of black smoke from vehicles and factories, fire is not from pure wood of trees, the skies are not blue but they have not been overpowered by modern bastards as God resides in them.

What Indians eat is not from natural farms but processed food from factories with lots of chemical content. Every thing is refined with chemicals in factories like white maida, white sugar, white atta, refined oil. etc. Pure ghee, pure milk, pure dahi is all gone (All Indians had desi cows in their courtyard 100 years back). The livestock is gone. The whole of India is badly diseased and people die before they attain 50 years of age. The great Ayurveda with thousands of herbs for all horrible diseases (The herbs cured in reality but were thrown out by western hospitals) is gone as the forests are all gone. Food in Western nations is totally pure as they have not destroyed their pure lands. But for Asia and other lands they have the Live and Let Die policy. Live yourself to the fullest with natural lands but kill all other cultures and religions. Eat drink and be merry with your own lands but destroy other lands of the world. The eatables in India and China are all impure and with millions of pesticides and chemicals. People in India and China are dying of hunger and malnutrition, diseases, and because of polluted cities. The land acquisition policy of 1894 by western powers is responsible for this downfall. Because of the western chemical based medicines whole of the world is diseased, people spend their whole fortunes but are still without health all over India and China. The western hospitals all over the world are killing fields as 90% of the illnesses cannot be cured by western medicines, still the entire world is fooled by (MNC Medical companies) of the west who earn billions of dollars every hour all around the world. They will operate you by creating fear of death in you but will eat up all the money you have and still the root cause of the disease is not cured. India did Yoga, Pranayama, Ayurveda in its clean environment and people (200 years back) in India and China lived happy, healthy, contented lives of 150 – 200 years. Today in India the cities in India have Great unclean nallahs (drains) that produce mosquitos and kill lakhs of Indians with mosquito borne diseases each year. The west has brought hell on earth in India. When I was in Australia I saw people habits of the who drank liquor to their hearts content, they killed cows and consumed a lot of red meat, they gambled in casinos, they did a lot of adultery (sex outside marriage). It is normal in the west. With their kalyugi habits they have spoiled the whole world. The whole world follows their basically wrong ideology and suffer at the hands of God. The western

world has taught the art of consumerism of mostly synthetic goods to the entire world. They pick up every thing in plastic wrappers on all that they consume and that has put plastic waste in the whole world cities.

To Indians they say save your environment and plant trees in concrete cities which die away soon due to lack of water and soil cover. These trees are covered all around by concrete and have no soil cover.

I travelled in Australian states of Queensland, New South Wales and was shocked to see massive farms, forests, green short mountains, clean rivers all over. For thousands of miles all I saw was farms, farms and farms, totally healthy people working on farms, totally prosperous, people. Kangaroos, horses, cows, sheep, goats and other farm animals roamed around everywhere in these farms. India was also like this 300 years back until the 1894 Land Acquisition Act that took away all our lands. When I travel in India in 2018 it is full of concrete cities, full of 20 lane roads, plastic garbage of cities that is piling all over, very few remaining farms, forests, with chaotic and traffic full roads, factories all over, foreign weeds all over the roadsides and on farms, sick people, unhealthy people, polluted rivers and hell on earth.

India's full Government Machinery works for the West and their interests. Nobody in India works for poor, farmers, labourers, no party talks about roti or disappearing food and farms from India. They are all working to get western companies to India since 1991 (open door policy of all parties, political people), while they do not work for the country or its poor people, who are left in despair and they look after themselves in their horrible condition. Everybody outside India laughs at Indians as how they have been tricked into a poor and a horrible country. They will call you "you bloody Indian", You bloody slum dog,

And they will ridicule and discriminate you every where you go. Yes they will make you a modern slave who work for their country and kicked around till you either leave their country or convert to their religion and be like them.

All governments since 1947 have done the job of a property dealer. They acquire farmlands, cut them up into plots sell them to everyone and make horrible concrete cities and roads. These so called developed lands have concrete homes which provide the facility of shitting pissing in toilets and make a lot of sewage with detergents, acid, Harpic that goes to destroy all the rivers of India. All they do is lay a lot of pipes that, take the sewage directly to the rivers to pollute them. They will take water from clean rivers, or underground resources but the cities will produce a lot of garbage and dirty water as is the case of dirty Yamuna, made by Delhi residents and the horrible factory effluents. The farmlands have no value in India but the decadent cities have expensive rates for their horrible plots which keep rising with time just because they are able to sell lots of synthetic products to expanding city dwellers or they are in the middle of markets and cities. The food producing lands in India have no value and are looted by politicians and authorities and further turned to horrible concrete cities. The whole money (tax) of poor people in India goes to make concrete cities, western hospitals (who have no cure for 80% of illnesses or diseases), schools colleges that give only western education but no sanskars or moral Indian values and are churning out students who hate Indian cultural values and further migrate to western countries and work as slaves there.

The rivers of India have lakhs of Dams that have dried them up in the Himalayas or Indian Ganga plains (flat lands). These lands were once the most productive farms of the whole world but now they are full of lakhs of polluting concrete cities and lakhs of 20 lane roads. Example Ghaziabad, Meerut, Hapur, Sonapat, Panipat, and hundreds of surrounding polluting cities.

Mining for metals, coal and stones, marbles, sand mining has made Whole of India a horrible sight. All beautiful villages are now slums. All the governments call the shopkeepers Jamakhors of grains but in reality there are very few farms, very few farm production which has further increased adulterated food items all over India. The poor people are blamed for adulterated farm products but in reality there is extremely less amount of farm produce with 60% of food being imported into India. The simple people of India who are hungry and thirsty think that India has lots of food and farm production and that their governments are doing a good job in agriculture. But basically every one India is being fooled by western powers and their stooges in India.
